Career Objective

Enthusiastic and self-motivated Computer Science Engineering student with a strong foundation in software development, web technologies, mobile application development, and programming. Passionate about building innovative, scalable, and user-centric applications while continuously learning emerging technologies. Seeking an opportunity to contribute technical expertise, problem-solving abilities, and creativity in a challenging software development role while growing as a professional software engineer.

Technical Skills

- **Programming Languages:** C, C++, Java, Python, PHP
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Database & Backend:** MySQL, Firebase
- **Tools & Platforms:** Git, GitHub, WordPress, Visual Studio Code
- **Operating Systems:** Windows
- **Languages:** English, Telugu, Kannada

Education

SV College of Engineering, Tirupati <i>Bachelor of Technology (B.Tech) in Computer Science Engineering (Lateral Entry)</i>	2025 – Present
Bheema Institute of Technology and Science, Adoni <i>Diploma in Computer Science Engineering – 89%</i>	2022 – 2025
Zilla Parishad High School, Mantralayam <i>Secondary School Certificate (SSC) – 86%</i>	2021 – 2022

Projects

Human Emotion Detection Using Convolutional Neural Networks (CNN)

- **Technologies:** Python, OpenCV, TensorFlow, CNN
- Developed a deep learning model to recognize human facial emotions from images using Convolutional Neural Networks.
- Applied image preprocessing and face detection techniques using OpenCV to improve prediction accuracy.

Multi-Property Hotel Reservation System

- **Technologies:** PHP, MySQL, HTML5, CSS3, JavaScript
- Designed and developed a comprehensive web-based hotel reservation platform for managing multiple accommodation providers.
- Implemented secure user registration, authentication, and online booking functionality.
- Integrated MySQL database for efficient storage and management of hotel, customer, and booking information.

- Designed a responsive and user-friendly interface compatible with desktop and mobile devices.

Smart Attendance Management Application

- **Technologies:** Flutter, Dart, Firebase Authentication, Cloud Firestore
- Developed a cross-platform mobile application for digital attendance management using Flutter.
- Integrated Firebase Authentication to provide secure user registration and login functionality.
- Implemented Cloud Firestore for real-time attendance storage, synchronization, and data retrieval.

EduSyncAI – AI-Powered Chrome Extension

- **Technologies:** JavaScript, HTML5, CSS3, AI APIs
- Developed an AI-powered Chrome extension to improve student learning and academic productivity.
- Integrated AI APIs to provide intelligent academic assistance, content generation, and quick learning support.

Activities & Achievements

- Participated in the **Institutional Start-Up Competition Hackathon** organized by the Department of Computer Science and Engineering (Data Science), SV College of Engineering (August 2025).
- Continuously enhance technical knowledge by building real-world software projects and exploring modern development frameworks.

Hobbies & Interests

- Mobile App Development, Artificial Intelligence, Problem Solving, Travelling, Technology Research
